

Benjamin McCain

New York, NY

www.linkedin.com/in/benjamin-mccain • <https://benjmac.github.io> • github.com/benjmac • <https://www.npmjs.com/~benjmac>

TECHNICAL SKILLS

Proficient: JavaScript, TypeScript, React, Node, Express, Angular, RxJS, Github CI/CD, Docker, k8s, Backstage, AWS, Terraform, SQL, HTML, CSS, D3, Git, Jest, Cypress, Knex.js, AI, AI Tooling, RAG, MCP, AI Agents, OpenAI, Anthropic, DataDog, Observability, Slack Bots

Familiar: Java, Python, Jenkins, Webpack, PostgreSQL, jQuery, A-Frame, A-Frame React, OAuth, socket.io, Glue42

PROJECTS

Ring Developer MCP - <https://github.com/benjmac/ring-developer-mcp>

Portfolio Personal Assistant - <https://benjmac.github.io>

Backstage Plugin Festive Fun - <https://github.com/benjmac/backstage-plugin-festive-fun>

Redux Action Combiner - <https://www.npmjs.com/package/redux-action-combiner>

Redux Iterator - <https://www.npmjs.com/package/redux-iterator>

WORK EXPERIENCE

Betterment, Senior Software Engineer - SRE Developer Experience, New York, NY

Apr 2026 - Present

Peloton Interactive, Senior Software Engineer - SRE Developer Experience, New York, NY

Aug 2023 - Feb 2026

- Developed a multimodal agentic Slack AI assistant using RAG/MCP to synthesize technical knowledge across siloed datasets
- Engineered Looker developer insights dashboards utilizing custom event handlers, Airflow, S3, Glue crawlers, and Athena
- Engineered incident management dashboard via AWS and Looker to ingest and visualize FireHydrant and Jira telemetry
- Led the migration from AWS CloudHSM1 to CloudHSM2M, modernizing secure APK signing infrastructure for production and updated associated Go-based tooling
- Tech Lead for Backstage developer portal, driving full-stack development via Node.js, TypeScript, React, and PostgreSQL
- Orchestrated scalable GitHub runner fleets on AWS via ARSS and Kubernetes for containerized build environments
- Engineered enterprise CI/CD tooling, creating reusable/callable GitHub workflows and custom actions
- Managed Jenkins infrastructure via AWS, leveraging Auto Scaling Groups to provision scalable EC2 controller and agent nodes
- Developed custom Slack integration to automate on-call discovery for PagerDuty managed services
- Founding member of the Peloton AI Working Group, defining org standards for AI governance and technical knowledge sharing
- Managed the enterprise Terraform/Scalr platform, supporting distributed IaC implementation across org wide repositories
- Drove organizational velocity via best-practice education while providing structural project guidance to junior team engineers
- Provided technical consultation for cross-functional AWS resource integration, guiding engineers through cloud architecture and IAM implementation
- Orchestrated 200+ complex CI/CD migrations to a resilient Github ARSS runner system on AWS EKS, managing secure IAM provisioning and authoring migration playbooks to avert legacy cluster EOL disruptions

Peloton Interactive, Software Engineer, New York, NY

July 2021 - July 2023

- Built developer portal utilizing Backstage; featuring custom plugins, scaffolding, cross-service auth, and a unified dev homepage
- Foundational engineer on greenfield dev portal; iteratively refined functionality to meet evolving org and product requirements
- Contributed to Backstage open source community for bug fixes and enhancements
- Led modular Backstage template campaign, eliminating redundancy to ensure consistent downstream microservice creation
- Developed a GitHub Action enabling engineering teams to instrument custom DataDog gauge metrics within CI/CD
- Reduced data engineering toil by centralizing Kafka cluster and broker visibility within the developer portal
- Presented at company-wide microservices series, highlighting Backstage template impact on standardized service scaffolding and developer velocity
- Supported company wide hackathons via Backstage, managing project registration and event workflows to drive organizational innovation
- Engineered a centralized Service Registry using field-completeness metrics to drive organizational data integrity and discoverability

JP Morgan Chase & Co, Senior Associate Software Engineer, Jersey City, NJ

Feb. 2021 - July 2021

- Mentored junior engineers while overseeing technical standards and delivery for established project work-streams

JP Morgan Chase & Co, Associate Software Engineer, Jersey City, NJ

Feb. 2019 - Jan. 2021

- Led UI development of a high-impact goals based financial planning application
- Developed internal RESTful Java APIs to facilitate data exchange between team owned microservices
- Contributed to enterprise-scale architectural design, data modeling, and internal service implementations
- Partnered cross-functionally with Product/UX to influence technical strategy and deliver intuitive user-journey improvements

JP Morgan Chase & Co, Software Engineer, Jersey City, NJ

Nov. 2017 - Jan. 2019

- Engineered and supported enterprise grade advisor wealth planning applications leveraging Angular and React/Redux
- Developed Selenium based tool to quantify user journey load times, providing actionable telemetry for performance optimization
- Created Protractor E2E test suites, automating quality validation within the CI/CD deployment pipeline

Fullstack Academy, Teaching Fellow and Software Engineer Intern, New York, NY June 2017 - Sept. 2017

Praxis Electronic Medical Records, Director of Interfaces, Buenos Aires, Argentina May 2013 - July 2016

- Led team as head technician in English and Spanish to build, test and repair interfaces for medical documents

Praxis Electronic Medical Records, Implementation Manager, Buenos Aires, Argentina Mar. 2013 - Apr. 2013

Praxis Electronic Medical Records, Customer Service Representative, Buenos Aires, Argentina June 2012 - Feb. 2013

Former Senator Blanche Lincoln & Former Representative Mike Ross, Intern, Washington, D.C. June 2010 - Aug. 2010

EDUCATION

Fullstack Academy of Code, New York, NY Feb. 2017 - May 2017

Washington and Lee University, Lexington, VA Sept. 2007 - May 2011

Major: Politics (Strong Liberal Arts education, emphasis in Political Science - Global/International)
